podatkiem

Opis produktu:

- ? Praca w wysokich temperaturach otoczenia do 43°C (wersja Tropik).
- ? Precyzyjna regulacja temperatury w zakresie od -18°C do -22°C.
- ? Izolacja poliuretanowa o grubo?ci 60 mm i g?sto?ci 40 kg/m³.
- ? Automatyczny mechanizm zamykaj?cy drzwi z blokad? przy 90 stopniach.
- ? Mo?liwo?? eksportu danych do systemu HACCP i tryb ECO.

QUESTION *What is the difference between a qualitative and a quantitative approach to research?*

ANSWER Qualitative research is designed to explore and understand a phenomenon or a concept in a subjective way. It aims to gain insights into the underlying meanings, experiences, and perspectives of individuals. Quantitative research, on the other hand, is designed to measure and analyze data in a systematic and objective manner. It aims to establish generalizable findings and test hypotheses using statistical methods.

QUESTION *What are the strengths and limitations of qualitative research?*

ANSWER Qualitative research has several strengths, including its ability to provide rich, detailed information, explore complex phenomena, and understand the context of a situation. It allows researchers to gain insights into the experiences and perspectives of participants. However, it also has limitations, such as its subjective nature, which may lead to bias, and its lack of statistical generalizability. Qualitative research is often time-consuming and may require a large sample size to achieve saturation.

QUESTION *What are the strengths and limitations of quantitative research?*

ANSWER Quantitative research has several strengths, including its ability to provide objective, measurable data, test hypotheses, and establish generalizable findings. It allows researchers to quantify variables and analyze data using statistical methods. However, it also has limitations, such as its lack of depth and understanding of the underlying meanings and experiences of individuals. Quantitative research may also be limited by the quality of the data and the appropriateness of the statistical methods used.

[illegible]

Cechy produktu:

Gwarancja: 2 lata

Czas realizacji: 3-5 tygodni

Szerokość (mm): 1342

Głębokość (mm): 768

Wysokość (mm): 850

Czynnik chłodniczy: R290A

Zasilanie: elektryczne

Napięcie zasilania: 230 V

Moc elektryczna (kW): 0.31

Pojemność (L): 2 x 150

Ilość drzwi: 2

Agregat: Wewnętrzny

Rodzaj prowadnic (GN): 1/1

Długość stołu (mm): 1250-1492
