Opis produktu:

Google

Google has been involved with a number of projects in the area of open source software. The following is a list of some of the projects that Google has supported or developed:

- Android**: Google has been a major force in the development of the Android operating system, which is an open source platform for mobile devices.
- Chromium**: Google has been a major force in the development of the Chromium web browser, which is an open source browser that powers Google Chrome.
- TensorFlow**: Google has been a major force in the development of the TensorFlow machine learning framework, which is an open source library for deep learning.
- Open Source Software**: Google has been a major force in the development of a wide range of open source software, including the Google Cloud Platform, the Google Kubernetes Engine, and the Google Cloud Storage.

Google has also been a major force in the development of a number of other open source projects, including the Google Cloud SDK, the Google Cloud Datastore, and the Google Cloud Bigtable.
